Ways to Save on Your Next Energy Bill

Want to lower your home energy bills and be more environmentally friendly? Here are 10 simple ways to reduce energy waste, at home and at work:

1. Make the switch to LED

LEDs are a great example of how innovation and technology can make your life easier. They last at least 25 times longer and consume up to 90 percent less electricity than incandescent bulbs.

Tip: By switching five of your home's most frequently used bulbs with ENERGY STAR® certified LEDs, it's possible to save \$75 on energy costs annually.

2. Seal Those Leaks

On average, heating and cooling account for almost half of a home's energy consumption. In fact, all the little leaks can be equivalent to leaving open a 3-foot-by-3-foot window.

Tip: Take simple steps like caulking windows, sealing leaks around chimneys and recessed lighting, and sliding draft guards under your doors to save up to 20% on heating costs.

3. Heat and Cool Efficiently

Don't waste money heating or cooling an empty home. Install a programmable thermostat and in colder weather schedule your home's heat to lower when you are away or asleep, and increase when you are returning home or waking-up. In warm weather, schedule the thermostat to raise the temperature when you are away or asleep, and lower it at other times.

Tip: Follow the U.S. Department of Energy recommended temperatures and be energy-efficient all year.

4. Maintain Your HVAC System

Make sure to clean or change your furnace filters regularly. A dirty furnace filter will slow down air flow, making the system work harder to keep you warm (or cool) and costing you more money.

Tip: Consider getting a winter tune-up. Just as a tune-up for your car can improve your gas mileage, a semi-annual or yearly tune-up of your heating and cooling system can be vital to improve efficiency, saving you money and making your home more comfortable.

5. Look for the ENERGY STAR® Label

ENERGY STAR® labeled windows can cut heating costs by as much as 30% compared to single-pane windows, while increasing indoor comfort and lessening fading of home furnishings.

Tip: If you are undertaking a major home remodel or new build, consider installing ENERGY STAR® qualified HVAC equipment and appliances.

6. Turn the Electronics Off

That sounds easy, but too often we forget and leave electronics plugged in that are not in use.

Tip: Turn off unnecessary/idle lights, appliances and

electronics. A power strip can help turn off multiple items at once. (Sometimes the simplest things are really effective!)

7. Winter Tip: Invite the Sun In

It feels like the sun abandons us during the winter, but that doesn't mean we should ignore it during the shorter days.

Tip: Open curtains/shade on your west-and south-facing windows during the day to allow sunlight to naturally heat your home, and save 2%-12%.

8. Summer Tip: Close Blinds and Shades

This tip is easy to forget, but vital: excess sunlight will make it harder to keep your home cool and comfortable.

Tip: During the day, keep your blinds and shades closed to prevent warm air from building up in your home.

9. Clean Your Clothing Efficiently

That's an easy one. A washing machine spends 90% of its energy to heat water.

Tip: Consider using cold water instead. In addition, try to run full loads as much as possible, because the machine uses roughly the same amount of energy regardless of the load size. Also, consider air-drying.

10. Clean Up Your Dishes Efficiently

If there's one thing that has the power to unite people, it's food. And with food comes dishes to clean. Fear not – there really is a more efficient way to use your dishwasher.

OCTOBER CALENDAR

Most meetings are livestreamed between PUCN offices in Carson City & Las Vegas and on the PUCN website.

OCT. 2-3 | HEARING | 10 AM

OCT. 6 | HEARING | 10 AM

OCT. 23-26 | HEARING | 10 AM

Application of Nevada Power Company d/b/a NV Energy for authority to adjust its annual revenue requirement for general rates charged to all classes of electric customers and for relief properly related thereto.

ENERGY EFFICIENCY PROGRAMS FOR NEVADANS

Nevada law requires natural gas and electric utilities to implement conservation plans that include programs and incentives to encourage consumers to conserve energy. These plans must be approved by the PUCN.

Check with your natural gas and electric utilities to see which programs the companies offer to encourage conservation, such as rebates for purchasing high-efficiency appliances and free energy audits for homes and businesses.
